

## Publications:

37. R. Itoh and T. Hatano, Geological implication of grain-size segregation in dense granular matter. *Philosophical Transactions A* **377**, 20170390 (2018)
36. Y. Yamaguchi, S. Takada, and T. Hatano, Rheology of Cohesive Granular Particles under Constant Pressure, *J. Phys. Soc. Jpn.* **87**, 094802 (2018)
35. T. Matcharashvili, T. Hatano, T. Chelidze, and N. Zhukova, Simple statistics for complex Earthquake time distributions. *Nonlin. Processes Geophys.* **25**, 497-510 (2018)
34. S. Roy and T. Hatano, Creep-like behavior in athermal threshold dynamics: Effects of disorder and stress. *Phys. Rev. E* **97**, 062149 (2018)
33. Y. Ootani, J. Xu, T. Hatano, and M. Kubo, Contrasting Roles of Water at Sliding Interfaces between Silicon-Based Materials: First-Principles Molecular Dynamics Sliding Simulations. *J. Phys. Chem. C* **122**, 10459 (2018)
32. H. Tanaka and T. Hatano, Statistical properties of Olami-Feder-Christensen model on Barabasi-Albert scale-free network. *Eur. Phys. J. B* **90**, 248 (2017)
31. T. Hatano, C. Narteau, and P. Shebalin, Common dependence on stress for the statistics of granular avalanches and earthquakes. *Scientific Reports* **5**, 12280 (2015)
30. T. Hatano, Friction laws from dimensional-analysis point of view. *Geophys. J. Int.* **202**, 2159-2162 (2015)
29. P. Van, N. Mitsui, T. Hatano, Non-equilibrium thermodynamical framework for rate- and state-dependent friction. *Periodica Polytechnica Civil Engineering* **59**, 583-589 (2015)
28. Y. Satoh, T. Hatano, N. Nita, K. Nogiwa, and H. Matsui, Simulation of Transmission Electron Microscope Images of Dislocations Pinned by Obstacles. *Materials Transactions* **55**, 413-417 (2014)
27. O. Kuwano, R. Ando, and T. Hatano, Granular friction in a wide range of shear rates. *Proceedings of the 7th International Conference on Micromechanics of Granular Media*, AIP Conf. Proc. **1542**, pp. 32-37 (2013)
26. O. Kuwano, R. Ando, and T. Hatano, Crossover from negative to positive shear rate dependence in granular friction. *Geophys. Res. Lett.* **40**, pp. 1295-1299 (2013)
25. T. Hatano and O. Kuwano, Origin of the velocity-strengthening nature of granular friction. *Pure Appl. Geophys.* **170**, pp. 3-11 (2013)
24. 波多野恭弘, 摩擦法則におけるミクロ・マクロ対応. *表面科学* **34**, pp. 62-67 (2013)
23. H. Kawamura, T. Hatano, N. Kato, B. Soumya, and B. Chakrabarty, Statistical physics of fracture, friction and Earthquake. *Rev. Mod. Phys.* **84**, 839 (2012)
22. O. Kuwano, and T. Hatano, Flash weakening is limited by granular dynamics. *Geophys. Res. Lett.* **38**, L17305 (2011)
21. T. Hatano, Rheology and dynamical heterogeneity in frictionless beads at jamming density. *J. Phys. Conf. Ser.* **319**, 012011 (2011)
20. T. Hatano, Constitutive law of dense granular matter. *J. Phys. Conf. Ser. vol.* **258**, 012006 (2010).
19. T. Hatano, Critical scaling of granular rheology. *Prog. Theor. Phys. Suppl.* **184**, 143 (2010).
18. T. Hatano, Scaling of the critical slip distance in granular layers. *Geophys. Res. Lett.* **36**, L18304 (2009).
17. T. Hatano, Growing length and time scales in a suspension of athermal particles. *Phys. Rev. E* **79**, 050301(R) (2009).
16. T. Hatano, Scaling properties of granular rheology near the jamming transition. *J. Phys. Soc. Jpn.* **77**, 123002 (2008). Awarded Editors' choice. 第19回日本物理学会論文賞受賞
15. T. Hatano, T. Kaneko, Y. Abe, H. Matsui, Void-induced cross slip of screw dislocations in fcc copper. *Phys. Rev. B* **77**, 064108 (2008).
14. T. Hatano, Rheology of a dense granular material. *J. Phys. Conf. Ser.* **89**, 012015 (2007).
13. T. Hatano, Power-law friction in closely-packed granular materials. *Phys. Rev. E* **75**, 060301(R) (2007).
12. T. Hatano, M. Otsuki, and S. Sasa, Criticality and scaling relations in a sheared granular material. *J. Phys. Soc. Jpn.* **76**, 023001 (2007).
11. T. Hatano, Dynamics of a dislocation bypassing an impenetrable precipitate: the Hirsch mechanism revisited. *Phys. Rev. B vol.* **74**, 020102 (R) (2006).
10. T. Hatano and H. Matsui, Molecular dynamics investigation of dislocation pinning by a nanovoid in copper. *Phys. Rev. B* **72**, 094105 (2005).
9. T. Hatano, Dislocation nucleation in shocked fcc solids: effects of temperature and preexisting voids. *Phys. Rev. Lett.* **93**, 085501 (2004). Reprinted in *Vir. J. Nan. Sci. & Tech.* vol. **10**, issue 9 (2004).

8. T. Hatano, Temperature dependence of shock-induced plasticity: a molecular dynamics approach. Shock Compression of Condensed Matter 2003, AIP Conference Proceedings **706**, 221-224 (2004).
7. T. Hatano, Spatiotemporal behavior of void collapse in shocked solids. Phys. Rev. Lett. **92**, 015503 (2004).
6. T. Hatano and D. Jou, Measuring nonequilibrium temperature of forced oscillators. Phys. Rev. E **67**, 026121 (2003).
5. T. Hatano and S. Sasa, Steady-state thermodynamics of Langevin systems. Phys. Rev. Lett. **86**, 3463-3466 (2001).
4. T. Hatano, Jarzynski equality for the transitions between nonequilibrium steady states. Phys. Rev. E **60**, R5017-R5020 (1999).
3. T. Hatano, Heat conduction in the diatomic Toda lattice revisited. Phys. Rev. E **59**, R1-R4 (1999).
2. T. Hatano and S. Sasa, Numerical simulations on Szilard's engine and information erasure. Progress of Theoretical Physics, **100**, p.695-702 (1998).
1. S. Sasa and T. Hatano, Numerical simulations on Maxwell's demon. Statistical Physics: Experiments, Theories and Computer Simulations, edited by M. Tokuyama and I. Oppenheim, (World Scientific, Singapore, 1998) pp.167-170. Invited paper.
