ISEF/IWEP5, Time Table under construction

	Speaker (affiliation of the speaker*)	Title (some are tentative)
8:30-9:10	*Lunch And Party Payment*	*Reservation Required for both Boxed Lunch and Party.*
May 25, Fri.	*Opening Remark*	
9:10-9:30	**Masao Nakatani (20 min.)** (Earthaukqe Research Institute, the Univ. of Tokyo)	**Short-term precursors, why do I care? (Opening Remark,/Lecture)**
	Reasons for pessimism	
9:35-10:15	**Satoshi Ide (40 min.)** (Dept. Earth and Planetary Science, the Univ. of Tokyo)	**Multiscale heterogeneities in earthquake source process**
10:20-11:00	**Takeshi Sagiya* and Yo Kamikawa (40min.) NA for 26pm** (Disaster Mitigation Research Center, Nagoya University)	**The pre-slip controversy: a review of the 1944 Tonankai and the 2011 Tohoku-oki cases and their implications for short-term prediction**
break	*Minute To Day*	
11:20-12:00	**Kosuke Heki (40min.) NA for 26** (Dept. Earth Planet Sci., Hokkaido Univ.)	**The "Standard Model" of Preseismic TEC Anomalies**
lunch		
13:00-13:40	**Satoshi Itaba* and Yasuhiro Umeda (40min.) NA for 26** (Geological Survey of Japan, Advanced Industrial Science and Technology)	**On the well-water and sea-level changes witnessed before the past Nankai Earthquakes**
	Day To Week	
13:45-14:25	**Jiancang Zhuang*, Mitsuhiro Matsu'ura, and Peng Han (40min.)** (The Institute of Statistical Mathemactics)	**Critical zone in the branching crack model for earthquakes: inherent randomness, earthquake predictability, and precursor modelling**
break		
14:45-15:25	**J. Y. Liu (40min.)** (National Central Univ., Taiwan)	**Statistical significance (analyses) on Ionospheris total electron content related to EQs**
15:30-16:10	**Katsumi Hattori and Peng Han* (40 min.)** (Chiba Univ.)	**Statistical significance (analyses) on ULF geomagnetic changes to EQs and assessment for short-term EQ forecast**
break		
16:30 - 17:00	**Open Discussion 1**	
17:00 - 17:55	**POSTER 1**	
18:00-20:00	Welcome PARTY	
May 26, Sat.		
	Day To Week	
9:00-9:40	**Kenji Maeda* and Fuyuki Hirose (40 min.) NA for 25** (Meteorological Research Institute)	**Empirical forecast of the occurrence of mainshocks based on foreshock activities**
9:45-10:25	**Morgan Page,* Karen Felzer, and Andrew Michael (40 min.)** (United States Geological Survey, US)	**Foreshocks are not predictive of future earthquake size**
break	*Week To Month*	
10:45-11:25	**Ting Wang*, Jiancang Zhuang, Mark Bebbington, Teruyuki Kato (40 min.)** (Dept. Mathematics and Statistics, University of Otago, New Zealand)	**Precursory signals from GPS data for short-term earthquake forecasts: signal processing and assessment**
11:30-12:10	**Dimitar Ouzounov (40 min.)** (Chapman University, US)	**Multi-parameter assessment of pre-earthquake atmospheric/ionospheric signals and their potential for short-term prediction**
lunch		
13:10-13:55	**Shunichi Nomura (40 min.)** (The Institute of Statistical Mathemactics)	**Statistical features and cluster-based discrimination of foreshocks**
14:00-14:40	**Varelio Tramutoli (40 min.)** (School of Engineering, University of Basilicata, Italy)	**Statistical analyses in Thermal Infra-Red anomalies related to earthquakes**
break		
15:00-15:40	**Angelo De-Santis (40 min.)** (Aeronomy and Environmental Geophysics, National Institute of Geophysics and Volcanology, Italy)	**Statistical validation of the possible Lithosphere-Atmosphere-Ionosphere Coupling prior to earthquakes by means of 3.5 years of Swarmsatellite electromagnetic data analysis**
15:40 - 16:10	**Open Discussion 2**	
16:10 - 17:10	**POSTER 2**	
May 27, Sun.		
	Combination	
9:00-9:40	**Yoshihiko Ogata (40 min.) NA for 25** (The Institute of Statistical Mathemactics)	**Probability forecasts of a large earthquake by combination of statistical characteristics and anomalies of seismic activity**
9:45-10:15	**Open Discussion 3**	
break	*Wrap-up Discussion*	
10:35-10:55	**Masao Nakatani (20 min.)** (Earthaukqe Research Institute, the Univ. of Tokyo)	**A revised seismogenesis scenario implied by the discovery of a too consistent, immediate precurosr - I think I've figured it out!**
11:00-11:20	**Max Wyss (20 min.)** (International Center of Earth Simulation Foundation, Geneva and San Francisco)	**Namazu and Earthquake Prediction**
11:20-12:20	**Max Wyss, Masao Nakatani (60 min.)** (Discussion Leader)	**Concluding Discussion: Precursor studies - Sound? Useful? Interesting?**
