

DEAR FRIENDS OF ERI

My stay in Tokyo and working for ERI will be one of the highlights of my academic career, and working with the excellent scientists and staff at ERI has been an absolute pleasure. It was a delight to learn about the tectonic setting of my newly adopted home of Japan, by going on several fieldtrips on Honshu and the Ryukyus to see active faults rivaling those elsewhere. I only have kind words for ERI, and your excellent foreign exchange program. I have made many new friends and I have learned from all of you. Thank you for being supportive, kind, and sharing in all of your ideas. You will be missed - until the next time we meet.

With kindest regards,

Mike Taylor
