Muon and Neutrino Radiography
(March 9, 2010 Tokyo, Japan)

Measurements on SiPMs and fast WLS fibers

G. Saracino

University and INFN, Napoli, Italy

The report will cover the following items: measurements on SiPM produced by IRST and by Hamamatsu (voltage-current response, dark noise, gain); measurements on scintillators read by Kuraray Y11 and Bicron BCF92 fast fibers, to investigate the possibility of background rejection by time-of-flight. This meeting was supported by the Earthquake Research Institute cooperative research program.
